Office Action Summary

Application No.

10/779,293

Applicant(s)

MOHR, KURT

Examiner

Lan Nguyen

Art Unit

3683

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 February 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) 3,9-11 and 13 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,2,4-8,12,14 and 15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 13 February 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☒ Other: Translation of EP 523338A2 ✓

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-8, 12, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Wahnschaffe et al. (EP 0523338 A2).

Re: claim 1, Wahnschaffe et al. show a disc brake, as in the present invention, comprising: a caliper, two brake shoes 20, 20, which are pressable against both sides of a brake disc 23 and which in relation to a peripheral force generated upon application of the brake shoes against the brake disc are supported against a vehicle-fixed carrier, wherein the peripheral force in dependence upon a direction of rotation of the brake disc acts in one of two opposite peripheral force directions, as shown in figure 4 and page 18, lines 17-23; at least one device 10a for at least one of measuring and converting the peripheral force, the device being disposed in a force transmission chain between at least one of the brake shoes 20 and the carrier; and at least one force transmission member 18, which is disposed between at least one of the brake shoes 20 and the device 10a for at least one of measuring and converting the peripheral force and which is movable under guidance in a plane parallel to the brake disc wherein the at least one force transmission member 18 is disposed at one side relative to the caliper in order to

Art Unit: 3683

take up and transmit the generated peripheral force in only one of the two peripheral force directions as shown in figure 4 and page 18, lines 19-23.

Re: claim 2, figure 4 further shows guide 22 being rigidly coupled to the carrier.

Re: claim 4, figure 4 shows the force transmission member 18 is guided in a rotary manner, rotating about bolt 22.

Re: claim 5, as shown in figure 4, the force transmission member 18 is a swivel element, which has a swiveling axis, the axis of bolt 22, parallel to an axis of rotation of the disc 23.

Re: claim 6, figure 4 shows the swivel element 18 being coupled to the carrier by bolt 22.

Re: claims 7 and 8, figure 4 further shows two force transmission members 18, 18 and two devices 10a, 10a disposed at each side of the brake disc 23.

Re: claim 12, figure 4 and page 18, line 4, show device 10a to be a force sensor.

Re: claim 14, figure 4 shows the force transmission member 18 being profiled at a region interacting with the brake shoe 20 and wherein the at least one brake shoe has a complementary profiling.

Re: claim 15, Wahnschaffe et al. show a vehicle brake system having a disc brake, as in the present invention, comprising a caliper, two brake shoes 20, 20, which are pressable against both sides of a brake disc 23 and which in relation to a peripheral force generated upon application of the brake shoes against the brake disc are supported against a vehicle-fixed carrier, wherein the peripheral force in dependence upon a direction of rotation of the brake disc acts in one of two opposite peripheral force

Art Unit: 3683

directions, as shown in figure 4; at least one device 10a for at least one of measuring and converting the peripheral force, the device being disposed in a force transmission chain between at least one of the brake shoes 20 and the carrier as shown in figure 4; and at least one force transmission member 18, which is disposed between at least one of the brake shoes 20 and the device 10a for at least one of measuring and converting the peripheral force and which is movable under guidance in a plane parallel to the brake disc, member 18 rotates about the axis of bolt 22, wherein the at least one force transmission member is disposed at one side relative to the caliper in order to take up and transmit the generated peripheral force in only one of the two peripheral force directions, as shown in figure 4 and page 18, lines 19-23.

Response to Arguments

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection due to the availability of the translation of EP 0523338 A2 . A copy of the translation is enclosed for Applicant's record. The Examiner regretfully withdraws the indication of allowable subject matters and apologizes for any inconveniences this might have caused.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lan Nguyen whose telephone number is (571) 272-7121. The examiner can normally be reached on M-F, 8 to 4:30.

Art Unit: 3683

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on (571) 272-7095. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
